ACTIVE TRAVEL

 **NatraTex**[®]
Colour

As part of an active travel scheme, a dedicated cycleway was required to improve safety, accessibility, and clarity between road users. NatraTex® Colour Green was selected to deliver a high-visibility, durable surfacing solution.

- Clearly delineate cycle routes from pedestrian areas
- Improve safety at crossing points and junctions
- Integrate inclusive design features such as tactile paving
- Deliver a long-lasting, low-maintenance solution

Solution

NatraTex® Colour Green was installed as a fully bound asphalt surface across the cycleway, providing a seamless, high-contrast finish that integrates with road markings and tactile paving.

Result

The completed scheme delivers a safe, clearly defined cycle route that improves user confidence while enhancing the visual quality of the public realm.

If you would like to know how NatraTex® can enhance your scheme, email today: enquiries@natratex.co.uk

Clear demarcation between users

Enhanced safety and visibility

Durable, fully bound surface

Low maintenance alternative to painted surfaces

Supports active travel and sustainability goals
