

As part of a wider regeneration project, Monmouth School for Girls sought to upgrade the main parking entrance area to improve both functionality and visual appeal. The objective was to create a safe, durable, and aesthetically sympathetic surface that complemented the character of the school environment.

Solution

NatraTex Cotswold was selected to deliver a high-quality, decorative and hard-wearing surface. Its natural aggregate finish provided a visually appealing entrance that blends seamlessly with the surrounding landscape while clearly defining vehicle and pedestrian areas

Outcome

The completed parking entrance now delivers a welcoming first impression while improving usability and safety. The use of NatraTex Cotswold has contributed to a robust, visually appealing solution aligned with the school's regeneration objectives.

If you would like to know how NatraTex® can enhance your scheme, email: enquiries@natratex.co.uk

- ✓ Enhances site aesthetics with a natural stone appearance
- ✓ Provides a durable, long-lasting surface suitable for frequent vehicle use
- ✓ Improves demarcation of parking and entrance areas
- ✓ Low maintenance solution with fast installation
- ✓ Supports regeneration goals by elevating the overall environment
