

SAATCHI GALLERY

Case study | Regeneration

SAATCHI GALLERY

 **NatraTex**[®]
Colour

As part of a wider regeneration of the Saatchi Gallery's external environment, the project required a high-impact surfacing solution to enhance the public realm surrounding this iconic contemporary art venue. The surface needed to reflect the gallery's creative identity, withstand heavy pedestrian footfall, and provide clear visual demarcation across key external areas.

Solution

NatraTex® Colour – Red was selected to deliver a bold, seamless finish that transforms the external space into a vibrant and engaging extension of the gallery. The rich red tone creates strong visual contrast, improving wayfinding while reinforcing the gallery's modern, design-led aesthetic.
